Riyadh, Saudi Arabia

Technology executive with twenty years from code to the leadership table. I set technology strategy, lead AI adoption, build the teams that own it, and run platforms for millions of customers at Saudi Arabia's largest telecom group.

SCOPE OF LEADERSHIP

Technology strategy
Entertainment and sales platforms

Platform modernisation
Apps, cloud, infrastructure, streaming

Build vs. buy
Vendor-managed to in-house platforms

Engineering organisation
In-house teams with Saudi talent

Reliability at scale
High-volume platforms, major migration

AI adoption
Engineering, operations, support, customers

Budget & value
Multi-million SAR technology budgets

Architecture & governance
Continuity, vendors, Agile delivery

EXPERIENCE

General Manager, Entertainment Technology
Nov 2025 – present

stc

Leading the technology function for stc tv and entertainment platforms, end to end: engineering, architecture, infrastructure, operations, platform reliability and delivery.

- Defining and executing the technology strategy for entertainment and digital platforms.
- Modernising applications, cloud and on-premise infrastructure, integrations and streaming platforms.
- Driving scale, performance and reliability on high-volume platforms, including a major platform migration.
- Leading AI and automation adoption across engineering, operations, support and customer-facing features.
- Owning technology governance, architecture, service continuity and vendor performance; building in-house engineering capability.

General Manager, Business Applications
Mar 2019 – Nov 2025

channels by stc

Technology strategy and delivery for sales applications at one of Saudi Arabia's largest telecom operators.

- Built and led an in-house development team, reducing reliance on external vendors.
- Migrated critical enterprise solutions from vendor-managed to in-house platforms: significant cost savings and faster deployment.
- Designed AI-powered process automation that cut operational workload.
- Led Qwik, winner of the Middle East Technology Excellence Award 2022.
- Managed multi-million SAR technology budgets.

Director, Consumer Demand Management
Dec 2015 – Dec 2018

stc

The primary IT interface for every project from stc's Consumer sector, guiding strategy, architecture and delivery of large transformation programmes.

- Directed enterprise solution blueprints aligned with business goals and architecture standards.
- Helped set IT vision and strategy for stc's long-term transformation; led the adoption of Agile delivery.

Section Manager, eServices Demand Management
May 2013 – Dec 2015

stc

Customer-facing digital channels: the stc portal, MySTC portal and app, and the internal portal.

- Kept platforms stable, secure and scalable for millions of users; sped up releases and reduced downtime.

Project Manager
Aug 2011 – Apr 2013

Ministry of Foreign Affairs

- E-services for Protocol and Security Affairs; in-house applications that replaced manual processes; RFPs and vendor evaluation.

Senior Business Analyst
Jun 2009 – Aug 2011

stc

- IT solutions for mobile services, integrating enterprise applications with core telecom network elements.

Senior Business Analyst
Oct 2008 – Jun 2009

Ministry of Education

- IT solutions for the Ministry’s portal and e-services; RFPs and vendor proposal evaluation.

Programmer
Dec 2005 – Jul 2007

stc

- Mediation systems for GSM and landline billing on UNIX.
